RAISE YOUR LIMITS

VSPEC-III

NEW GENERATION HIGH-PERFORMANCE CEILING FAN

LIKE EVOLUTION ITSELF, WE FOCUS RELENTLESSLY ON IMPROVING THE BREED.
BOUNDARIES ARE PUSHED. BENCHMARKS CREATED. EXTREMES REDEFINED.
IT'S THE PROCESS THAT SHAPES EVERY HIGH-PERFORMANCE CEILING FAN.

POINT ONE
TECHNOLOGY
HIGH-PERFORMANCE CEILING FAN

HIGH-PERFORMANCE CEILING FAN

GUST VSPEC-III is an evolution of VSPEC-II: pursuit of pure performance. Improved aerodynamics, the Air Foil Mechanisms use the same fluid dynamic principles that generate thrust to take flight.

A modern interior space, likely a bedroom or living area, featuring a ceiling fan and large glass windows with horizontal blinds. The room is dimly lit, with light filtering through the blinds, creating a pattern of light and shadow. The overall aesthetic is minimalist and contemporary.

**EVERYTHING'S FOR A REASON .
IT'S THE BEAUTIFULLY SIMPLE
DESIGN PHILOSOPHY THAT
DEFINES EVERY
GUST VSPEC-III**

INTRODUCING

EC-CLASS

NEW GENERATION ULTIMATE-PERFORMANCE MOTOR

PUSHING BOUNDARIES AND CREATING NEW BENCHMARKS ARE THE
PROCESSES THAT SHAPE EVERY HIGH-PERFORMANCE CEILING FAN.
FIRST EVER EC-CLASS MOTOR IN SINGAPORE.

POINT ONE
TECHNOLOGY

P E R F O R M A N C E

WHAT SETS THE VSPEC-III APART IS NOT JUST IMMENSE POWER ALONE ,
BUT HOW EVERY SINGLE COMPONENT IS FOCUSED ON EFFICIENCY .

ENERGY SAVING RATING

DC-CLASS

PREVIOUS GENERATION

The current class of motor used in majority of ceiling fans. DC-Class motor has a high-efficiency rate but suffers from initial resistancy in the winding and eddy-current losess.

DC-Class motor does not require additional energy for induction of current.

ENERGY SAVING RATING

EC-CLASS

NEWEST GENERATION

Electronic Communicated [EC] motor is the newest version of the existing DC-Class motor with the addition of controls by external electronic circuit board.

Mechanical commutation is performed by electronic circuitry. Current is delivered in the right direction at the precise time. Higher accuracy and power to speed efficiency is achieved.

ENERGY SAVING RATING

AC-CLASS

PAST GENERATION

The previous generation of motor used in ceiling fans. AC-Class motor requires additional energy to create magnetic field by inducing currents on the rotor.

PERFORMANCE

EC-CLASS V8 TURBO PLATFORM

V8 Turbo is the third generation platform used to power high-performance ceiling fans. Operating on the principle of electronic controller to distribute current to the free spinning motor.

Coils are positioned in place of stator instead of conventional rotor. Internal winding pressure and centrifugal force are eliminated. Resulting in electrical power being put down efficiently.

ENHANCED MOTOR MORE POWER

New motor equates to new found power. The enhanced motor is capable of generating even higher air draft to cool space down much faster than before.

REDUCED POWER LOSS

Rounder, lighter, and smoother ceramic ball bearings compared to traditional steel ball bearings.

Reducing friction by up to 43%, translating to less energy loss.

The relative lightness reduces load on other components, resulting in increased performance.

HIGHLY-LUBRICATED

Less lubrication is needed due to the harder surface material and smoothness.

PRECISION

Less prone to expansion and contraction during temperature fluctuation. Enabling the motor to run precisely as intended during the entire operating period.

NON-CONDUCTIVE

Due to potential variable frequency, ceramic ball bearings eliminate the possibility of electrical arcing and electromagnetic interference.

PERFORMANCE

LE. DIODE ULTRA BRIGHT LIGHT KIT

Point One Technology focuses on the performance of the luminaire. Combining with Germanic chip maker, OSRAM GmbH., we created the brightest and the most efficient ceiling fan light kit.

The entirety of our light kit is made by casting a single aluminum block which is capable of withstanding 660 degree celcius. The aluminum assembly behaves as a giant heat sink. Additional fins are laser cut at the rear for further heat diffusion. Making it the only ceiling fan light kit capable of achieving **100 lumens per watt**.

The LED Chip is capable of mimicking natural light sources with over 90% accuracy. Colors are more vibrant wherever the light kit shines on.

OSRAM

GERMANIC CHIP MAKER

The LED Chip is the heart beat of every light kit. Point One Technology's Light Kit is powered by Germanic chip maker, OSRAM GmbH.

In 2021, we adopted the newly developed Surface Mounted Device (SMD) - 3014. Which is much smaller and more efficient than earlier SMD models. The smaller diode size makes it possible to fit more onto the electronic strip board, offering brightness and uniformity without needing extra power.

USER SAFETY

The evaluation safety occurs according to the standard IEC 62471:2006 (photo biological safety of lamps and lamps system). The device specified in this data sheet falls into the class low risk. Under exposure time condition, there are no endangerment to the eyes exist from the device.

POINT ONE
TECHNOLOGY

THE GUST VSPEC-III IS A LIVING PROOF OF
SINGAPORE'S FINEST ENGINEERING. A COMBINATION
OF FEARSOME AIR DELIVERY AND NATURAL POISE.
IT'S THE PERFECT STRENGTHS YOU FIND IN THE
ULTIMATE VENTILATION MACHINE, ENCAPSULATED IN
A CEILING FAN THAT TRULY CHANGES THE GAME.

A.B.S IS THE NATURAL CHOICE FOR
ULTIMATE DESIGN AND PERFORMANCE.
IMMENSELY STRONG, LIGHT, AND RIGID, IT
ALLOWS YOU TO DEFINE WHAT'S POSSIBLE.

IN GUST VSPEC-III THE ULTRA LIGHT
BODYWORK FORMS A PROTECTIVE SHELL AROUND
THE MOTOR AND THE INTERNAL COMPONENTS
THE CENTER OF GRAVITY IS KEPT RADICALLY
CLOSE TO THE CEILING FOR EXTRA STABILITY
WHILE ROTATING AT HIGH SPEEDS.

IT'S THE BEAUTIFULLY
SIMPLE DESIGN PHILOSOPHY
THAT DEFINES EVERY
